YOUR NEW KITCHEN PLANNING GUIDE

Your kitchen is the hub of your home and a hive of activity. Creating a great kitchen is the number one way to add value to your home so it's important to spend the time to get it right. Whether you're building, renovating, getting the house ready to sell, or just giving your kitchen a bit of an update, this planning guide helps you work through the process of creating your dream kitchen. With kitchen designers, door and drawer ranges, benchtops, sinks, taps, and appliances, The Good Guys have everything you need to bring your new kitchen to life.

PLANNING YOUR NEW KITCHEN IN 4 SIMPLE STEPS

- 1. IDEAS**
Get lots of ideas and inspiration from this guide and The Good Guys Kitchens website. You'll find helpful Kitchen Talk videos, appliance Buying Guides, and a gallery of kitchen photos to help you through the kitchen planning process.
- 2. APPLIANCES**
Decide on the kind of appliances you want so when you design your kitchen you'll have enough space allocated for things like a French door fridge, double oven or appliances that can be built-in like your microwave and coffee machine.
- 3. DESIGN & CONSULT**
Book your free in-home appointment with one of The Good Guys Kitchen's highly qualified designers.
- 4. PLANS**
The Good Guys Kitchen's online system allows you to access and approve your plans, make payments and communicate with the kitchen team throughout the whole process.

KEY CONSIDERATIONS

IT'S IMPORTANT TO THINK ABOUT THESE
KEY KITCHEN QUESTIONS FROM THE OUTSET.

YOUR ANSWERS WILL HELP SHAPE
YOUR KITCHEN'S LAYOUT AND DESIGN.

- What are the measurements of your kitchen space?
- Will your kitchen flow to your dining and lounge areas?
- Do you want the kitchen to flow into your outdoor area?
- Do you entertain a lot?
- Do you want to be able to keep an eye on the kids doing their homework or watching TV whilst cooking?
- What style of kitchen appeals to you?
- What's your storage style? Do you prefer cupboards or large drawers?
Do you want a pull out pantry?
- What sort of benchtop suits your lifestyle – stone, solid surface or laminate?
Do you understand the benefits of each type?
- Do you want a little study nook in the kitchen to make working from home and life admin easier?
- Do you want benchtop appliances and cooking mess hidden away in a butler's pantry for an uncluttered, minimalist kitchen?

Your answers will help The Good Guys Kitchens create your perfect kitchen.

CANOPY RANGEHOOD.

HOT TREND HANDLES

Handles are a way of adding a personal touch to kitchens while also maintaining a functional aspect as we see more and more integrated appliances in our kitchens.

THE ENTERTAINER'S KITCHEN

Lots of drawers for platters and serving bowls, a big island bench for chatting to friends while you chop, and a big French door fridge with an ice and water dispenser plus room for everything, coupled with a coffee machine, are essentials for the entertainer.

HOT TREND FEATURE TAPS AND SINKS

Taps and sinks can be fashionable as well as functional. Now available in a wide range of colours like black, bronze and traditional stainless steel.

HOT TREND BUTLER'S PANTRY

A butler's pantry provides an excellent space to prepare meals and hide dirty dishes out of sight (and out of mind!) while entertaining so you don't miss a valuable moment with your guests. Larger spaces may include a second sink, second dishwasher or wine fridge.

IDEAS

HOT TREND APPLIANCE WALL

Have all your key appliances integrated on one wall with your oven, microwave and even your coffee machine.

HOT TREND FEATURE SPLASHBACK

Your splashback is an ideal place to add your creative flair, whether through colour, glass over exposed brick, feature lighting or signature tiles.

CONTEMPORARY KITCHEN

Contrasting colours combined with the warmth of timber, modern black built-in cooking appliances, and integrated cabinetry handles create a contemporary kitchen that's both stunning and practical.

HOT TREND GLASS SIDED DRAWERS

Practical and stylish, glass sided drawers are the finishing touch for your new kitchen.

HOT TREND FEATURE STORAGE SHELVES

A mixture of shelving, drawers and cupboards can help break up a large kitchen and gives you space to display some of your favourite items.

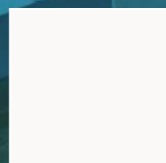

HOMELY MINIMALISM

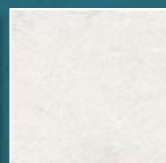

A beautiful island bench with a waterfall edge and integrated cabinetry handles create sleek kitchen lines, and everyday benchtop appliances are easily accessible yet cleverly tucked away inside the cabinetry. The modern splashback adds interest and the timber feature lighting balances the minimalism with homely warmth.

IDEAS

HOT TREND BENCHTOP PROFILES

It's the little details that will help set your kitchen apart, such as an inverted edge benchtop profile (otherwise known as the sharknose profile), or this shadowline to really make your benchtop pop.

HOT TREND EASY ACCESS CUPBOARDS

For a sleek look, hide appliances you use often behind roller shutter or bi-fold cupboard doors for easy access.

HAMPTONS STYLE KITCHENS

Inspired by The Hamptons in New York, a “shaker kitchen” has white glass-fronted timber cabinets, a marble look benchtop, ornate handles, and white subway splashback tiles for relaxed, coastal kitchen style that will stand the test of time.

CLASSIC KITCHEN

Timeless and fresh with a neutral colour palette and freestanding all-in-one cooker, classic kitchens keep things simple and appeal to most. Personal touches can be added through feature lighting, handles and a contrasting benchtop colour.

IDEAS

HOT TREND WATERFALL END

The benchtop flows from the top of the island right down to the floor for sleek kitchen lines and extra wow-factor in any kitchen.

See more

HOT TREND INTEGRATED APPLIANCES

Hiding appliances like dishwashers and fridges behind cabinetry creates streamlined continuity for a classic kitchen with a modern twist.

TRADITIONAL WITH A MODERN TWIST

Traditional timber cabinetry and a classic marble look benchtop are paired with stainless steel and black appliances for a modern twist on the traditional kitchen.

HOT TREND RANGEHOODS

Your rangehood can be a statement piece, a pull out design where you only see a small amount of it, or completely concealed behind cupboards for a truly minimalistic look.

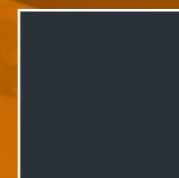

HOT TREND MIX AND MATCH

Combining different materials and textures creates a unique look in the kitchen and is a clever way to link the kitchen to furniture and decor in connecting rooms. Try pairing glass cabinetry with timber to bring a bold and dynamic feel to your kitchen space.

STEP 2:

APPLIANCES

It's really important to decide on your appliances before designing your new kitchen. Your designer needs this information so they can allow enough space for things like a French door fridge or large freestanding cooker, and your style of appliances will have an influence on the overall look.

OVENS

An essential part of every modern kitchen, a good oven should give you and your family years of well-cooked meals. With so many different brands and types on the market, The Good Guys are here to help you work out which oven is right for you.

SIZE AND TYPES OF OVENS

Bigger may not always be better, particularly if you have a smaller kitchen and need an oven to fit within the available space. There are typically three types of oven: built-in single, built-in double and freestanding.

OTHER THINGS TO CONSIDER

- Capacity
- Cleaning
- Kitchen layout
- Oven doors
- Control settings

Check out the complete buying guide for your new oven at buyingguide.thegoodguys.com.au

BUILT-IN DOUBLE

As with built in single models, these need to be installed in an oven housing, although they boast a bigger capacity than their counterparts. They will require more space, but have either a separate smaller grill oven or two large oven cavities, making them ideal for people who are cooking big meals.

BUILT-IN SINGLE

A built-in single model oven needs to go in an oven housing, whether this is at eye level or under the worktop. Single multifunction ovens usually have a grill included, which saves space but means you can't use the grill and oven functions at the same time.

FREESTANDING COOKERS

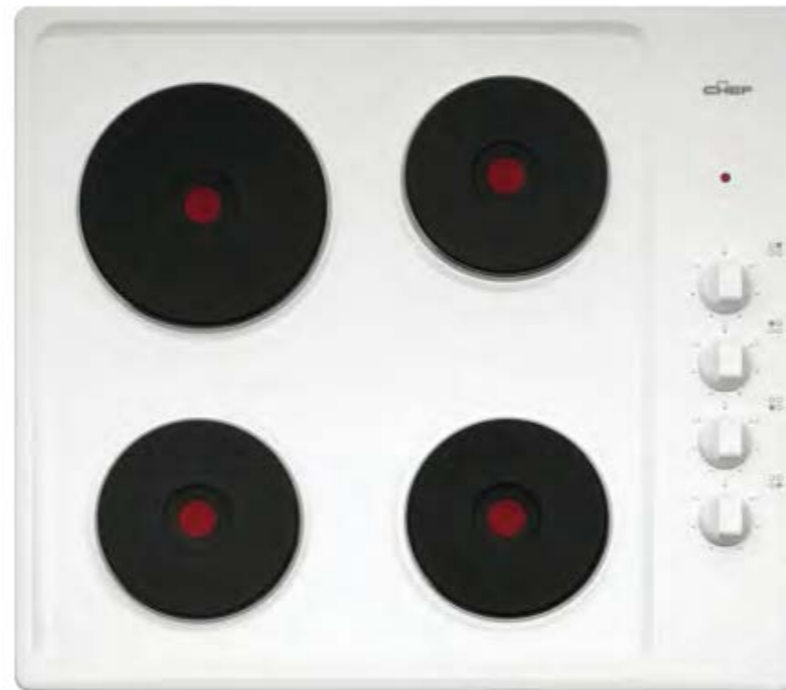

Unlike built-in appliances, freestanding ovens are designed to fit into the space between two cupboard units. They are either fitted with brackets or are freestanding and come in a variety of widths depending on the capacity.

COOKTOPS

Cooktops come in a variety of types and sizes, giving you the flexibility to choose an appliance that matches with your kitchen decor. Cooktops have come a long way since the introduction of the traditional four-burner models, so The Good Guys are here to help you work out which cooktop is right for you.

TYPES OF COOKTOPS

There are three standard types of cooktop: gas, electric and induction.

OTHER THINGS TO CONSIDER

- Size and space
- Power settings
- Useful extras

Check out the complete buying guide for your new cooktop at buyingguide.thegoodguys.com.au

INDUCTION

Induction cooktops are the most expensive, using magnetic field-based heating rather than applying direct heat to the pan. Not only do induction models have the fastest cooking times, they are the most energy efficient and you can set your dishware anywhere across the entire surface.

ELECTRIC

The temperature on electric cooktops is slower to change, making on-the-fly cooking a bit more difficult. However, they are cheaper to install than their gas counterparts and they have no risk of gas leaks or open flames. Purchasing a model with a ceramic surface also makes cleaning easier than if you buy a traditional product with coil burners.

GAS

Many chefs prefer to use gas cooktops because the heat can be instantly modified when cooking. Food is also likely to cook quicker because the flames heat up the sides of pans as well as the bottom. This means they are often more energy-efficient to run, although they are pricier to get installed.

RANGEHOODS

While you may want your kitchen to be filled with the delicious aromas of the foods you're cooking, you'll still be producing lots of heat, moisture, grease and smoke. Not only will this damage your cabinets and walls over time, it's not great for your health. Rangehoods provide ventilation and remove bad odours, replacing fumes with fresh air.

TYPES OF RANGEHOODS

Choosing the right rangehood will depend on how your kitchen is set up. Here are several of the rangehood types available.

OTHER THINGS TO CONSIDER

- Size and space
- Power settings
- Useful extras

Check out the complete buying guide for your new rangehood at buyingguide.thegoodguys.com.au

UNDER CABINET HOODS

As the name suggests, these attach to the underside of a cabinet above your range.

CHIMNEY HOODS

Mounted to walls above the cooker, these models function with a flue that goes up the wall to the ceiling for ventilation.

ISLAND HOODS

These rangehoods hang from the ceiling over a cooktop island, meaning they need to connect to the exterior vent through ductwork in the ceiling.

DOWNDRAFT HOODS

Downdraft rangehoods attempt to reverse rising smoke and exhaust fumes through ducts underneath the floor. They have the benefit that they can be used anywhere in the kitchen, but are less effective because they perform a more difficult function.

DUCTLESS HOODS

Removes smoke and odours away from the cooktop, but doesn't remove them from the kitchen – instead recirculates them.

FRIDGE & FREEZERS

A refrigerator may not strike you as one of the most glamorous additions to your home, but a fridge is an absolute necessity and these days they have lots of cool new features – so be prepared to do some research before you take the plunge on a new model.

LAYOUT OF FRIDGE & FREEZE

Having done your homework, you'll probably be eager to start browsing the kinds of fridges that are available. Here are some of the most popular models, as well as some benefits and drawbacks:

OTHER THINGS TO CONSIDER

- Available space
- Capacity
- Energy efficiency
- Design, shelving and specialist features

Check out the complete buying guide for your new fridge & freezer at buyingguide.thegoodguys.com.au

TOP-MOUNT REFRIGERATOR

This fridge has been a mainstay in kitchens for decades and remains one of the most common designs. Fitted with a freezer compartment above the fridge that takes up around one-third of the size of the unit, this model is the most cost-effective, but still offers the functionality and shelf space required from a modern refrigerator.

BOTTOM-MOUNT REFRIGERATOR

As the name suggests, this is similar to the top mount model – only in reverse. Here the fridge sits above the freezer compartment, meaning the most commonly used items tend to be at eye level.

SIDE-BY-SIDE

Side-by-side refrigerators provide freezer and fridge compartments that are adjacent to each other. Great for galley-style kitchens, they usually don't need as much door clearance space (despite having greater capacity than top and bottom-mount fridges) and if you're feeling flash they can come with a variety of gadgets such as TVs and ice makers. However, be prepared to pay out a little more than you would for top- and bottom-mount options, plus they tend not to be as energy efficient.

FRENCH DOOR

A combination of the side-by-side and the bottom-mount fridge, this model is compartment heaven for any budding chefs out there. Two doors swing outwards, while the freezer is located underneath with either one or two drawers, depending on the product chosen. These fridges can store goods of all sizes, with wide shelves that can fit pizza boxes, lamb shanks and whatever else you want to keep cool.

DISHWASHERS

Dishwashers can make the chore of washing your pots and pans a thing of the past, while also ensuring your kitchen doesn't appear cluttered and untidy.

TYPES OF DISHWASHERS

The size of your dishwasher will be closely tied in with what type you end up buying. There are traditionally three options: Full Sized – 12 to 14 place settings, Slimline – 9 to 10 place settings, and Compact – 6 or less settings. Aside from size, there's also choice regarding the style of dishwasher you want.

OTHER THINGS TO CONSIDER

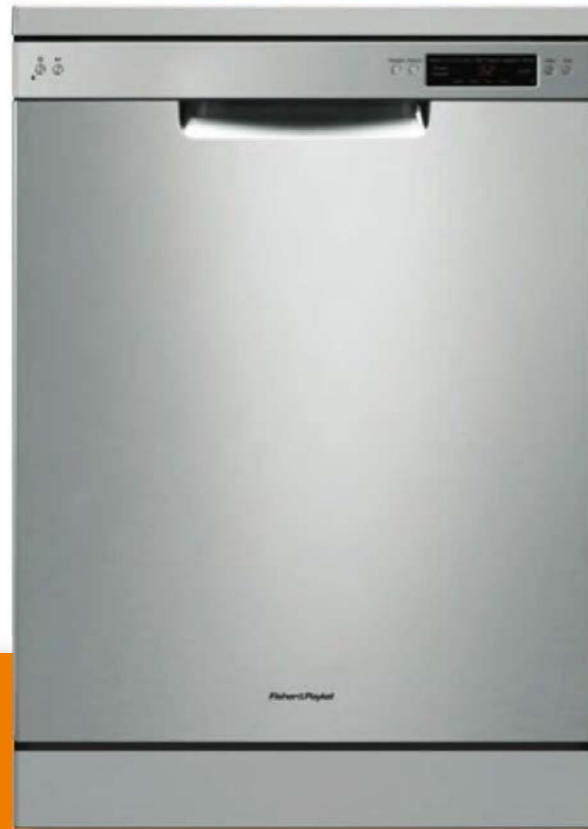

- Capacity
- Size
- Energy rating
- Water rating
- Features & programs

Check out the complete buying guide for your new dishwasher at buyingguide.thegoodguys.com.au

SLIMLINE

Ideal for kitchens where space is at a premium being only 45cm wide.

FREESTANDING

Can be installed anywhere in your kitchen and are designed to stand alone or used in kitchens with space for slotting appliances in.

FULLY INTEGRATED

Perfect for modern kitchens they are concealed entirely behind a door panel to match your cabinetry with the control panel neatly integrated into the top of the dishwasher door.

SEMI INTEGRATED

Perfect for modern kitchens they are fitted with a door panel for a seamless look, so you only see the control panel.

MICROWAVES

Microwaves can be found in most kitchens and can help you save a lot of time while cooking. There are two main types of microwaves - conventional and convection.

TYPES OF MICROWAVES

Microwaves can be built into the kitchen cabinets, stand alone on your kitchen bench, or fit into a specific spot to match your existing decor. Microwaves also come in stainless steel, white, silver, black and an increasing array of colour options to suit your personal style.

OTHER THINGS TO CONSIDER

- Wattage
- Size
- Settings & functions
- Capacity

Check out the complete buying guide for your new microwave at buyingguide.thegoodguys.com.au

CONVENTIONAL

- Converts energy into microwaves to heat the food
- Fast and efficient
- Comes with pre-set menu functions for ease of use when you are in a hurry

CONVECTION

- Similar to a conventional microwave, but also has a heating element and fan to circulate the air around the food
- Provides more variety in cooking, allowing for browning, crisping, baking and broiling

COFFEE MACHINES

Many people want to buy the best coffee machine for their home, not only for the quality of the coffee, but also how the machine will look on their benchtop or integrated with their other appliances.

TYPES OF COFFEE MACHINES

Selecting the type of coffee machine for your kitchen comes down to personal preference and how you like your coffee.

OTHER THINGS TO CONSIDER

- Size and weight
- Settings and features
- Storage and display

Check out the complete buying guide for your new coffee machine at buyingguide.thegoodguys.com.au

MANUAL

Most models use a motor driven pump to force the exact amount of water needed through a thermos block, creating coffee to your specific taste. While they require slightly more work than an automated machine, you have a lot more control over the final product.

CAPSULE

Pods or capsules are inserted into the machine, which then pierces the pod and forces hot water over the contents to create an espresso. Extremely fast and easy to use, although the capsules are slightly more expensive per cup than the equivalent in beans.

AUTOMATED

Often more expensive than manual models, as well as slightly noisier, they are the ultimate appliance for people who want quick coffee with little hassle.

INTEGRATED

These machines fit in perfectly with your other appliances for a sleek look and generally have a variety of settings to allow everyone their perfect cup of coffee.

COMPLETE YOUR KITCHEN

Funky benchtop appliances like a new kettle, toaster, mixer or coffee machine will complete your kitchen and enhance your overall design.

STYLISH MIXERS

Mixers so beautiful you'll want to proudly display them on your benchtop rather than hide them away in a cupboard.

CONTRAST OR COMPLIMENT

Do you want all your appliances to match in colour and style, or do you like contrasting colours for added interest?

TOAST FOR THE WHOLE FAMILY

Toasters come in a wide range of colours to complement your décor and a variety of sizes to suit your family.

SINKS & TAPS

It's so much easier to prep your food, keep drinks ice cold and dry dishes with clever accessories like timber chopping boards and colanders designed to fit flush inside your Oliveri kitchen sink.

BRUSHED STAINLESS STEEL

Australia loves brushed stainless steel because it looks great and minimises the appearance of scratches

APPLIANCES

See the full range of sinks and taps at thegoodguys.com.au/oliveri

COLOURED SINKS

sinks are now available in a wide range of colours such as black and copper to complement your kitchen design, or you can go with the traditional stainless steel.

STEP 2:

DESIGN YOUR KITCHEN YOUR WAY

Feeling inspired? Now it's time to get to the details: colours, finishes, layout, benchtops, handles, door profiles and more.

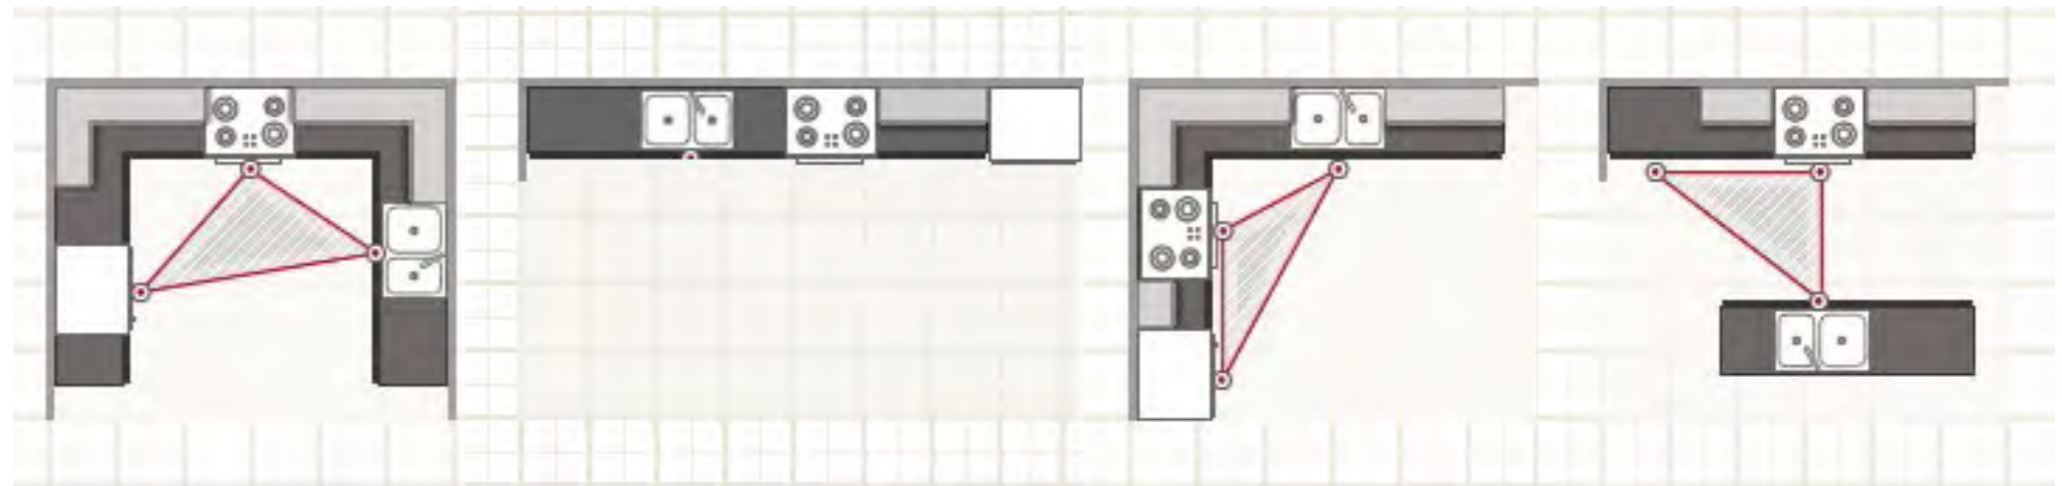

KITCHEN LAYOUT OPTIONS

The right layout for you will depend on the size of your kitchen and household, as well as your personal preference.

When considering which kitchen layout option works best for your space you need to keep the work triangle in mind – this refers to how the three key kitchen zones work together – your food prep, cooking, and clean up areas – so you can work as efficiently as possible in your kitchen.

U-SHAPE KITCHEN

The U-shape kitchen is suitable for larger kitchen spaces and is a great option for families who spend a lot of time in the kitchen.

GALLEY KITCHEN

The galley kitchen is the most functional kitchen design for most spaces. It is a modern design that allows the shortest access to all areas of the kitchen.

L-SHAPE KITCHEN

The L-shape kitchen is suitable for smaller spaces as it allows for more open space between working areas within the kitchen.

ISLAND KITCHEN

This single line kitchen includes an Island. It provides plenty of storage as well as extra work surface.

BENCHTOPS

An important part of your new kitchen is the benchtop. You can achieve different looks by complementing or contrasting your benchtop with your cabinetry, and even have different benchtops in different places in your kitchen.

SUPER MATT LAMINATE

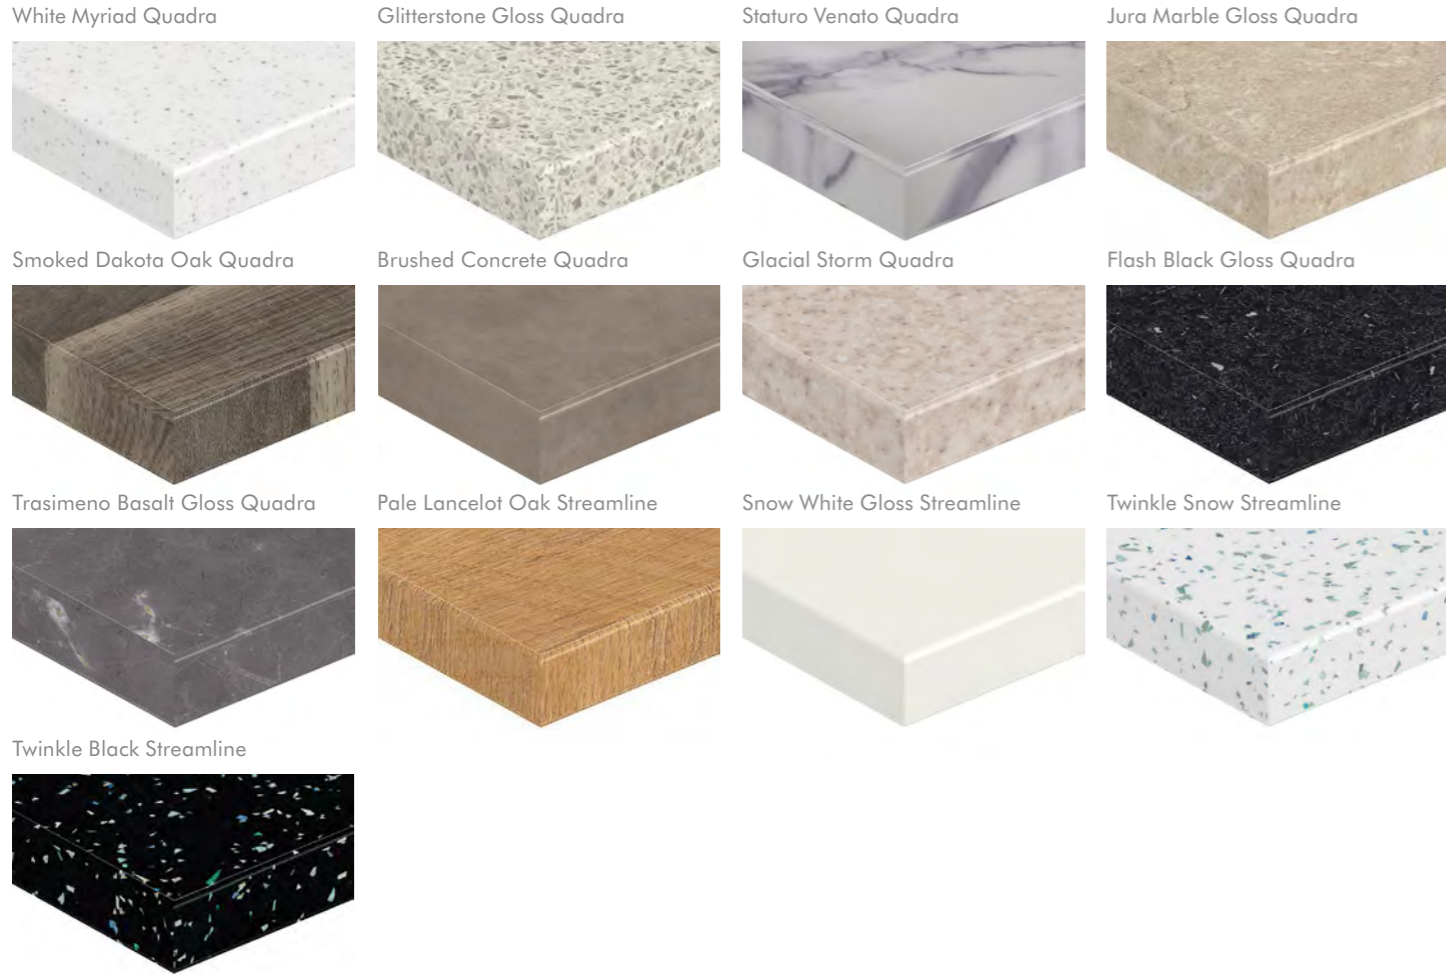

Imported from Italy, this smooth, matt benchtop is nothing short of stunning. This impressive material features an innovative nano technology to ensure it is resistant not only to fingerprints, but is also able to withstand knocks and scratches.

Matt Noir

LAMINATE

Manufactured in Europe, Serrafina Laminate benchtops are now available in a wide variety of colours at an affordable price, making them a practical and economical solution. With low maintenance and easy to clean surfaces, Serrafina Laminate benchtops are a consistently popular choice.

SERRAFINA SOLID SURFACE

Solid Surface benchtops provide a contemporary finish that is smooth to the touch. The surface is non-porous which means bacteria cannot harbour in the material. Each Solid Surface benchtop is made with a 52mm drop down edge and can be matched with any material to complete your kitchen. There are a wide range of popular stone effect colours to choose from. Inconspicuous joins create a seamless look that is easy to clean.

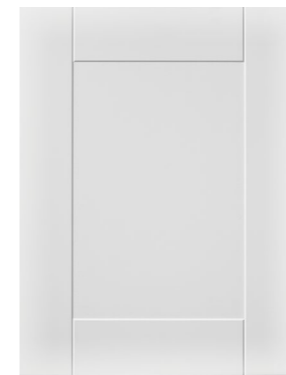

DOORS & DRAWERS CHOOSING YOUR KITCHEN CABINETS

Once you've decided on your overall kitchen style, choosing the colour and style of your cabinetry will be much easier.

Think about how the colour and style of your cupboards and drawers will enhance the look and feel of your kitchen. Light coloured cabinetry makes small kitchens feel bigger, and dark cabinetry with a glossy finish adds bold kitchen drama.

All of The Good Guys doors and drawers are soft-closing and the cabinetry range represents the most popular Australian colours and the latest in global trends.

Naree

Bundall

Somersby

Glass with square frame
(can be used in any
door range)

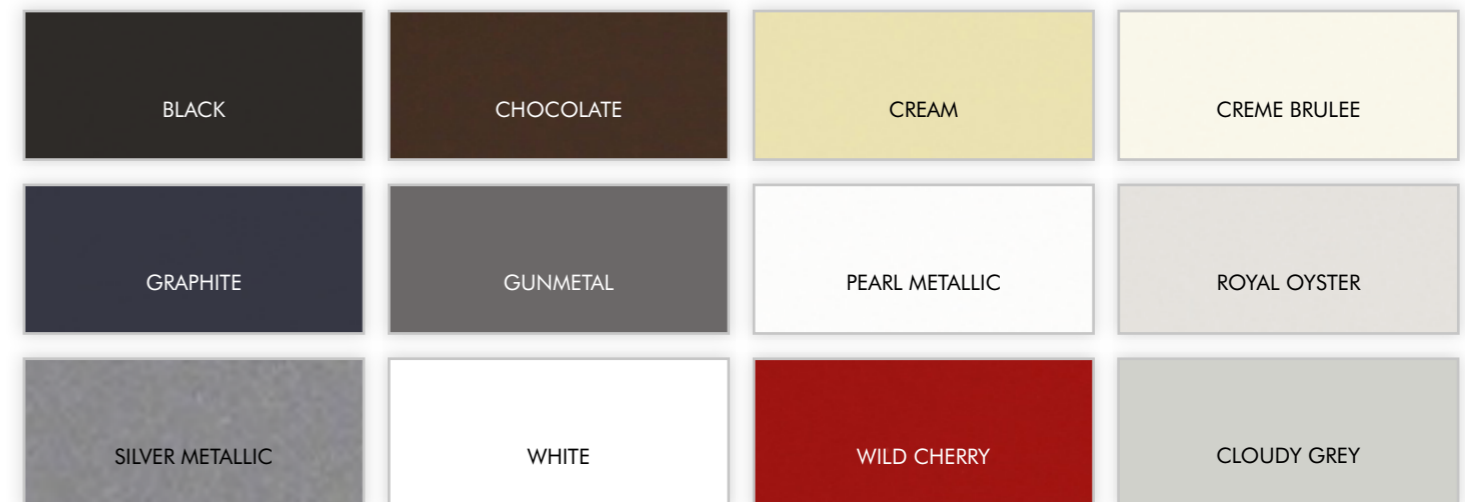

Carseldine

Caringbah

ARTARMON GLOSS

The Artarmon door is an ultra-high gloss door, available in a range of contemporary colours. Ideal for achieving a sleek modern look.

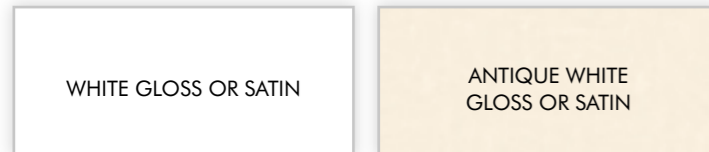

BALLINA

The Ballina is a horizontal timber grain door with a textured matt finish. Available in earthy timber colours, the Ballina works brilliantly as a feature door, combining well with gloss and matt surfaces.

BUNDALL

The Bundall is a style polyurethane door with a sophisticated square profile. Ideal for those seeking a high-end, traditional style kitchen.

CAIRNS

The Cairns is an aluminium framed feature door with glass inserts, and is available in any Dulux colour.

CARINGBAH

The Caringbah is a vacuum vinyl door with a choice of several different profiles. Available in a matt finish, this door is well suited to a traditional style kitchen.

CARSELDINE

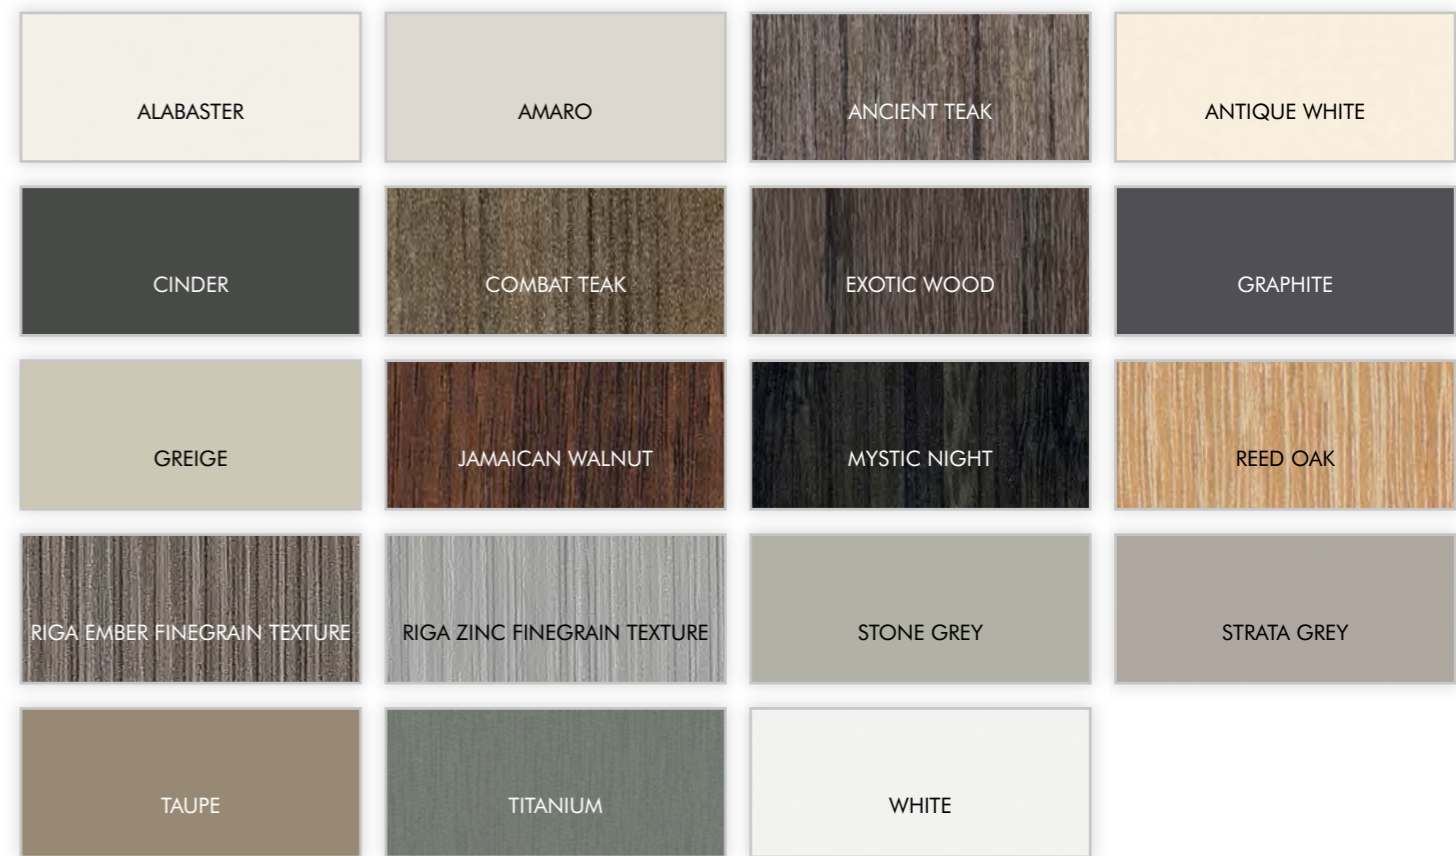

The Carseldine door is a vacuum formed door with a grooved central panel befitting a relaxed country or beach style kitchen. It is available in a neutral colour palette of whites and greys.

DESIGN

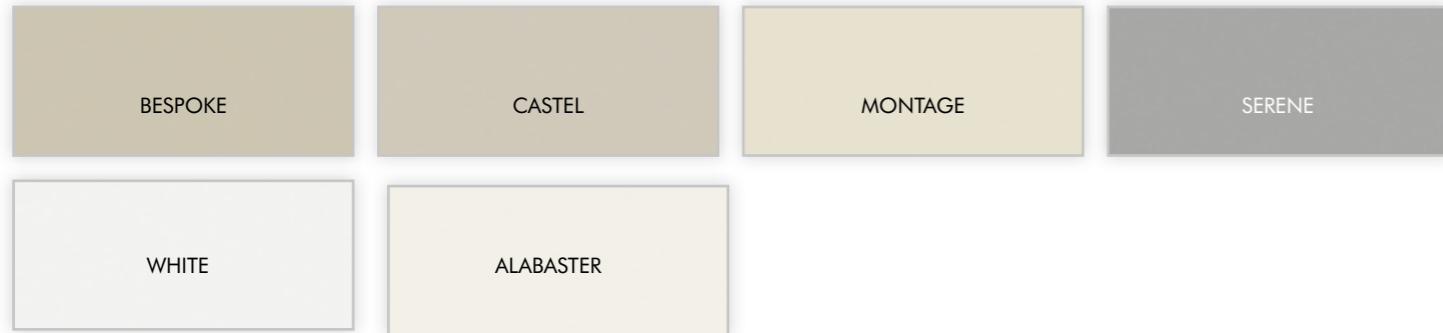

CHADSTONE

The Chadstone is a popular flat, melamine door available in an extensive matt colour range including timber grain options. A great base for achieving your desired style by mixing and matching with varying textures, tones and finishes.

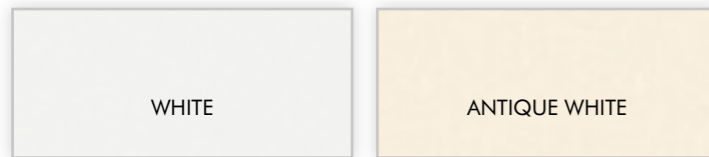

ESSENDON

The Essendon is a super matt non-gloss door that is highly durable and easy to maintain. Smooth to touch, the Essendon is a contemporary door favoured by those looking for a sophisticated finish.

HELENSVALE

The Helensvale is a textured melamine door that is well suited to both contemporary and traditional kitchen styles.

NAREE

The Naree is a classic shaker style door, available in a matt finish. A great choice for those seeking a Hampton's, coastal or French Provincial inspired kitchen.

SOMERSBY

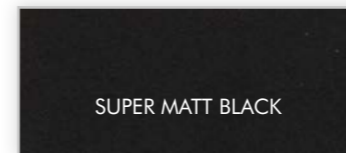

The Somersby is a shaker style door, available in a matt finish. A great choice for those seeking a Hampton's, coastal or French Provincial inspired kitchen.

DESIGN

SUPER MATT BLACK

Super Matt Black is a stunning door choice for any stylish, modern kitchen. Super soft to touch, and with anti-fingerprint qualities, this is a door that makes a statement.

WASHED OAK

The Washed Oak is a timber grain door available in both horizontal and vertical grains. Available in an array of striking colours, this door achieves a worn, washed look and is ideally used as feature cabinetry.

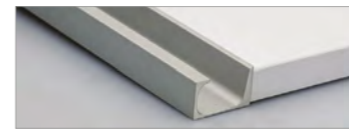

GET A GRIP YOU CAN HANDLE THIS

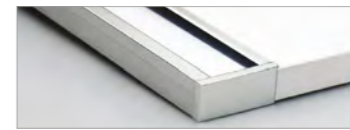

Once you've picked your doors, choosing handles for your cupboards and drawers is pretty simple.

Look for handles that match your style and overall kitchen design. A modern kitchen will suit sleek integrated handles like the Hestia or Marq, whereas a bar handle or cup style will be better for a traditional kitchen.

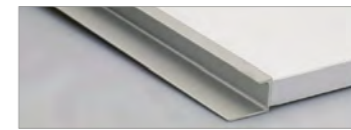

Also think about how easily you'll be able to open doors and drawers, and how comfortable they'll feel in your hand. Remember you'll use them a lot!

NO SPACE WASTED

AN ORGANISED KITCHEN

With clever storage solutions you can make sure no space is wasted and you can find what you're looking for fast.

The Good Guys Kitchens have lots of creative solutions for keeping your kitchen organised. Corner carousels inside kitchen cupboards make it easy to reach into corners that would otherwise become wasted space, a pull out pantry and spice drawers keeps everything nice and tidy, and rubbish and recycling bins hidden away under your sink near the dishwasher makes cleaning up quick and easy.

CORNER CAROUSELS

Corner carousels offer easy access to corner cabinets that are usually hard to reach.

RUBBISH BINS

Keep unsightly rubbish hidden away and your recycling organised behind cupboard doors with these easy access pull out bins.

DESIGN

EVERYTHING IN ITS PLACE

To help you be a more organised chef make the most of drawer accessories like spice racks, knife blocks and utensil dividers, making everything you need within reach and easy to find.

DRAWERS

Our selection of drawers make organisation a breeze. Soft close drawers come standard with all The Good Guys kitchens.

Crisp, clean white kitchens make for unlimited design possibilities, serving as a ready canvas for personal touches like splashbacks and lighting.

YOUR LAUNDRY YOUR WAY

These days laundry designs are linked to kitchen designs for home cohesion. The Good Guys Kitchens can help you create a stylish, organised laundry with enough space for sorting, washing, folding and ironing, and also help you find the right laundry appliances with special features that make life easier.

LAUNDRIES

WASHERS

Buying a washing machine is often one of the first items on the agenda when moving into a new home, but there are just as many people looking to update their existing model.

TOP LOADER OR FRONT LOADER

An important question to ask yourself is whether you want a top-loading or a front-loading washing machine.

Top loaders come in two types:

Agitator: Clothes are moved around by a central pole in the middle of the drum.

Impeller: This whips up the water to move clothes using a propeller-like device at the bottom of the machine.

With front loaders, clothes are piled in at the front and then jostled around by a spinning drum.

ADVANTAGES OF A TOP LOADER

- Lower purchase price
- Larger capacity
- Faster wash cycles
- Can open the washer mid-cycle to add clothes

ADVANTAGES OF A FRONT LOADER

- Cheaper over the long run
- More water and energy efficient
- More comprehensive settings
- Gentle on clothes
- Better for smaller spaces
- Shorter drying times

OTHER THINGS TO CONSIDER

- Size
- Settings & functions
- Capacity

DRYERS

Clothes dryers can significantly speed up the laundry process, meaning you don't have to rely on good weather or plenty of hanging space.

HEAT PUMP, CONDENSER, VENTED OR SENSOR

Dryers are one of the most expensive appliances to run so energy efficiency is extremely important. Look for the energy star ratings when comparing different models. More stars = more power bill savings! There are four different types of dryers:

OTHER THINGS TO CONSIDER

- Energy efficiency
- Capacity and size
- Dimensions
- How long does it take to dry?
- Lint filter
- Display and cycle programs

Check out the complete buying guide for your new dryers at

buyingguide.thegoodguys.com.au

VENTED DRYERS

With the lowest prices they are the most affordable to buy but they generate a lot of warm, moist air so need a ducting vent installed to pump the hot air outside the house, or need to be in a well-ventilated room to prevent mould forming.

SENSOR DRYERS

Smart sensors save energy by detecting when clothes are dry then switching off, which also prevents over-drying damage to clothes. These need a ducting vent that pumps the hot, humid air outside the house, or to be in a well-ventilated room to prevent mould forming. Sensor dryers are more expensive to buy than timed vented dryers, but they cost up to 15% less to run for power bill savings.

CONDENSER DRYERS

No outside venting is needed, so they are more expensive than vented dryers and great for rental homes. Some models have a water container that needs to be manually emptied after each load, and some have a hose that drains the water automatically.

HEAT PUMP DRYERS

The most energy efficient type of dryer and requires no venting. Heat pump dryers don't create hot air or moisture so they are perfect for apartments. They use less than half the energy of a vented or condenser dryer so the higher price is recouped on power bill savings over the dryer's lifetime.

Ready for your new kitchen?

Contact us to make a free in-home appointment with one of our In-Home designers or visit us in store at one of The Good Guys Kitchens Showrooms to speak to a Kitchen consultant about your new kitchen.
